Denton Parks and Recreation Concussion Policy

PURPOSE

The following policy and procedures are being implemented by the Denton Parks and Recreation Department, with the intent to reduce the potentially serious health risks associated with sports related concussions and head injuries.

POLICY

It is policy of the Denton Parks and Recreation Department to educate coaches, referees, staff, parents, and participants of the signs, symptoms or behaviors consistent with sports induced concussions. Participants suspected of a concussion or head injury, are required to be removed from the activity, must seek medical attention, and then follow the proper procedure for return to play. "When in doubt, sit them out!"

DEFINITION

A concussion is a type of traumatic brain injury that is caused by a blow to the head or body that jars or shakes the brain inside the skull. It is important to note that an athlete does not have to lose consciousness to have suffered a concussion. Symptoms include but are not limited to the following below.

SIGNS OBSERVED BY OTHERS

- Appears dazed or stunned
- Is confused about assignment
- Forgets an instruction
- Persistent vomiting
- Is unsure of game, score, or opponent
- Moves clumsily
- Answers questions slowly
- Loses consciousness (even briefly)
- Increasing sleepiness
- Shows mood, behavior, personality changes
- Can't recall events prior to hit or fall

SYMPTOMS REPORTED BY ATHLETE

- Headache
- Nausea or vomiting
- Balance problems or dizziness
- Double or blurry vision
- Sensitivity to light
- Sensitivity to noise
- Feeling sluggish, hazy, foggy, or groggy
- Concentration or memory problems
- Confusion
- Just not "feeling right" or is "feeling down"

ROLE OF COACHES AND STAFF

Coaches and staff will NOT be expected, nor will they be trained to "diagnose" a concussion. Diagnosis is the job of a qualified health care provider. Coaches and staff are being asked to use their best judgment in observing the signs, symptoms, and behaviors associated with concussions. If coaches or staff observes questionable signs, symptoms, or behavior, he/she must remove the player from the sporting event for further evaluation and notify the player's parent/guardian and fill out the appropriate accident form. Coaches and staff are not permitted to allow a player to resume activity until the Denton Parks and Recreation receives a written statement from a qualified health care provider indicating that the player is cleared to resume participation in the sporting event.

ROLE OF OFFICIALS

Officials will NOT be expected to "diagnose" a concussion. Officials are being asked to use their best judgment in observing the signs, symptoms, and behaviors associated with concussions. Officials will not be asked to give what could be perceived as a medical opinion. If an official observes questionable, signs, symptoms, or behavior, the official should notify the appropriate staff and the player should be removed from the sporting event. Officials are not responsible for the sideline evaluation or management of the player after he/she is removed from play.

ROLE OF PARENTS/GUARDIANS

Like coaches, staff and officials, parents/guardians will NOT be expected to “diagnose” a concussion. However, parents/guardians are being asked to become familiar with the signs, symptoms, and behaviors associated with concussions. Parents/guardians will be expected to comply with this Policy and support the determination made by staff to remove a player from a sporting event.

It is the parent/guardian’s obligation to have the player evaluated by a qualified health care provider and to obtain from that provider a written statement that clears the player to resume participation in the sporting event.

MANDATED COURSE OF ACTION

1. Remove player from the sporting event.
2. Notify parent/guardian.
3. Any player suspected of having a concussion should be evaluated by a qualified health care provider as soon as practicable.
4. Before a player will be allowed to resume participation in a sporting event, the parent/guardian of the player must obtain a written statement from a qualified health provider and return to the Denton Parks and Recreation Department indicating that the player is cleared to resume participation in the sporting event.

The signs, symptoms and behaviors associated with a concussion are not always apparent immediately after a bump, blow or jolt to the head or body and may develop over a few hours or longer. An athlete should be closely watched following a suspected concussion and should never be left alone.

Athletes should never try to “tough out” a concussion. Teammates, parents/guardians and coaches should never encourage an athlete to “play through” the symptoms of a concussion. In addition, there should never be an attribution of bravery or courage to athletes who play despite having concussion signs and/or symptoms. The risks of such behavior must be emphasized to all members of the team, as well as coaches and parents.

If an athlete returns to activity before being fully healed from an initial concussion, the athlete is at greater risk for a repeat concussion. A repeat concussion that occurs before the brain has a chance to recover from the first can slow recovery or increase the chance for long-term problems. In rare cases, a repeat concussion can result in severe swelling and bleeding in the brain that can be fatal.

Return to Play

After suffering a concussion, no athlete should return to play or practice on that same day. An athlete should never be allowed to resume play following a concussion until symptom free and given the approval to resume physical activity by an appropriate health-care professional. Documentation must be provided to the Denton Parks and Recreation athletic supervisor.

Once an athlete no longer has signs or symptoms of a concussion and is cleared to return to activity by an appropriate health-care professional, he/she should proceed in a step-wise fashion to allow the brain to re-adjust to exercise. In most cases, the athlete should progress no more than one step each day, and at times each step may take more than one day.

If symptoms of a concussion recur, or if concussion signs and/or behaviors are observed at any time during the return-to-activity program, the athlete must discontinue all activity immediately. Depending on previous instructions, the athlete may need to be re-evaluated by the health-care provider.
