

Escalon Recreation Department
Youth Sports
CODE OF CONDUCT

Player's Name: _____

Sport/ Year: Escalon Youth Flag Football-2024

Division: _____

Team: _____

▶ PARENTS MUST TURN IN TO TEAM COACH ◀
▶ COACH MUST TURN IN TO RECREATION DEPARTMENT BY October 11th 2024 ◀

PLAYER CODE OF CONDUCT

1. Play the game for fun.
2. Control yourself and set the best possible example of sportsmanship.
3. Be a good winner and a good loser.
4. Obey the rules and play fair.
5. Be a team player.
6. Treat your opponents and the officials with respect.
7. Be prepared to play at all times.
8. Treat equipment, uniforms and facilities with respect.
9. Respect your coaches and abide by team rules.
10. Work on improving your play and teamwork.
11. Do not use foul language.
12. Be the best you can be.

If a player is ejected by an official, he/she will be suspended from practices and games (the time length will be determined by the Recreation Department).

Player Sign (or print) _____ Date _____

PARENT CODE OF CONDUCT

1. Parents will not partake of alcoholic beverages prior to or during participation in any activity involving the coordinating or supervising of youths.
2. Control yourself and set the best possible example of sportsmanship.
3. Root for your team – NOT AGAINST THEIR TEAM.
4. Abide by all decisions of game officials.
5. Do not smoke or use tobacco in the area of practice or games.
6. Do not "heckle" or "ride" an opponent, official or spectator.
7. Do not use foul language.

If a parent is ejected by an official, he/she will be suspended from practices and games (the time length will be determined by the Recreation Department).

Inappropriate behavior devalues the sport and creates unnecessary stress for the player. It is not in keeping with the spirit of recreation youth sports. Any parent or player that fails to adhere to the Escalon Recreation Department CODE OF CONDUCT will be open to expulsion from games as well as having them or their child removed from Escalon Recreation Sports.

CONCUSSION INFORMATION

By signing this form, you acknowledge that you have read the Concussion Information Sheet and have been given a copy of the Heads Up Youth Sports Parents Fact Sheet.

(see reverse)

Parent representing the household:

Signature _____ Date _____

This sheet has information to help protect your children or teens from concussion or other serious brain injury. Use this information at your children's or teens' games and practices to learn how to spot a concussion and what to do if a concussion occurs.

What Is a Concussion?

A concussion is a type of traumatic brain injury—or TBI—caused by a bump, blow, or jolt to the head or by a hit to the body that causes the head and brain to move quickly back and forth. This fast movement can cause the brain to bounce around or twist in the skull, creating chemical changes in the brain and sometimes stretching and damaging the brain cells.

How Can I Help Keep My Children or Teens Safe?

Sports are a great way for children and teens to stay healthy and can help them do well in school. To help lower your children or teens' chances of getting a concussion or other serious brain injury, you should:

- Help create a culture of safety for the team.
 - › Work with their coach to teach ways to lower the chances of getting a concussion.
 - › Talk with your children or teens about concussion and ask if they have concerns about reporting a concussion. Talk with them about their concerns; emphasize the importance of reporting concussions and taking time to recover from one.
 - › Ensure that they follow their coach's rules for safety and the rules of the sport.
 - › Tell your children or teens that you expect them to practice good sportsmanship at all times.
- When appropriate for the sport or activity, teach your children or teens that they must wear a helmet to lower the chances of the most serious types of brain or head injury. However, there is no "concussion-proof" helmet. So even with a helmet, it is important for children and teens to avoid hits to the head.

How Can I Spot a Possible Concussion?

Children and teens who show or report one or more of the signs and symptoms listed below—or simply say they just "don't feel right" after a bump, blow, or jolt to the head or body—may have a concussion or other serious brain injury.

Signs Observed by Parents or Coaches

- Appears dazed or stunned.
- Forgets an instruction, is confused about an assignment or position, or is unsure of the game, score, or
- Opponent. Moves clumsily.
- Answers questions slowly.
- Loses consciousness (*even briefly*).
- Shows mood, behavior, or personality changes.
- Cannot recall events *prior to* or *after* a hit or fall.

Symptoms Reported by Children and Teens

- Headache or "pressure" in head.
- Nausea or vomiting.
- Balance problems or dizziness, or double or blurry vision. Bothered by light or noise.
- Feeling sluggish, hazy, foggy, or groggy.
- Confusion, or concentration or memory problems.
- Just not "feeling right," or "feeling down."

What Are Some More Serious Danger Signs To Look Out For?

In rare cases, a dangerous collection of blood (hematoma) may form on the brain after a bump, blow, or jolt to the head or body and can squeeze the brain against the skull. Call 9-1-1 or take your child or teen to the emergency department right away if, after a bump, blow, or jolt to the head or body, he or she has one or more of these danger signs:

- One pupil larger than the other.
- Drowsiness or inability to wake up.
- A headache that gets worse and does not go away. Slurred speech, weakness, numbness, or decreased coordination.
- Repeated vomiting or nausea, convulsions or seizures (shaking or twitching).
- Unusual behavior, increased confusion, restlessness, or agitation.
- Loss of consciousness (passed out/knocked out). Even a brief
- Loss of consciousness should be taken seriously.

What Should I Do If My Child or Teen Has a Possible Concussion?

As a parent, if you think your child or teen may have a concussion, you should:

1. Remove your child or teen from play.
2. Keep your child or teen out of play the day of the injury. Your child or teen should be seen by a health care provider and only return to play with permission from a health care provider who is experienced in evaluating for concussion.
3. Ask your child's or teen's health care provider for written instructions on helping your child or teen return to school. You can give the instructions to your child's or teen's school nurse and teacher(s) and return-to-play instructions to the coach and/or athletic trainer.

Do not try to judge the severity of the injury yourself. Only a health care provider should assess a child or teen for a possible concussion. Concussion signs and symptoms often show up soon after the injury. But you may not know how serious the concussion is at first, and some symptoms may not show up for hours or days.

The brain needs time to heal after a concussion. A child's or teen's return to school and sports should be a gradual process that is carefully managed and monitored by a health care provider.

Concussions affect each child and teen differently.

While most children and teens with a concussion feel better within a couple of weeks, some will have symptoms for months or longer. Talk with your children's or teens' health care provider if their concussion symptoms do not go away or if they get worse after they return to their regular activities.
